QIPP Financing Workgroup - June 9, 2016

- Guiding Principles
    - No state general revenue is available for QIPP and program design must ensure there is no risk to state general revenue.
    - QIPP financing must comply with CMS directives which include:
        - No IGT Responsibility Agreements
        - No pay-to-play (e.g., participation cannot be limited to entities with IGT)
- HHSC Parameters within which Financing Must be Developed
    - Local funds must be provided prior to the finalization of the capitation rates.
        - For example, local funds for SFY 2018 (9/1/17-8/31/18) would be due to HHSC by the end of May 2017.
    - The amount added to the capitation rates will be based on the amount of IGT received.
    - Eligibility for payments will NOT be contingent on the ability to IGT.
    - Federal matching funds drawn down by IGT will be shared among all qualifying NFs, not just those that generated IGT.
