Testimony for Senate Health and Human Services Committee Hearing March 8, 2017

RE: SB 790 by Sen. Miles - Relating to the continuation of the women's health advisory committee.

Good morning, Chair Schwertner and Members of the Committee.

I am writing on behalf of the Teaching Hospitals of Texas in support of SB 790 and the continuation of the Women's Health Advisory Committee. The Women's Health Advisory Committee has proven to be very helpful in providing the state with guidance as the state continues development and management of critical services including well-women exams, cancer screenings and contraception care.

The significant restructuring and consolidation of programs has been informed by the Committee through its clinical and operational expertise and insights for the program and the needs of Texans. As these programs continue to provide services within the new program structures, the next biennium will continue to be a critical time for this program.

We appreciate your work and your support enabling the continuation of this important committee. Please let me know if you need any additional information.

For context on THOT, I've included our commitments and service footprint below.

Our association of hospitals and health systems share three core commitments:

- Providing quality care for all with a special focus on vulnerable Texans.
- Ensuring care is there when it is needed through trauma care, disaster planning and services, and public health response.
- Preparing for the future by training our health workforce including graduate medical education and engaging in breakthrough clinical and delivery system research and transformation.

Saving lives today, preparing for tomorrow.

While only representing about four percent of Texas' hospitals and 16% of patient days, THOT members provide 21% of Medicaid care; 30% of the state's hospital provided outpatient care; 36% of the hospital care provided to uninsured Texans; almost two-thirds of Level 1 Trauma care; and about two-thirds of hospital based Graduate Medical Education residencies. THOT members comprise 11 of the 20 waiver anchors; provide significant outpatient care; and provide over one-quarter of the total funding for statewide Texas Medicaid hospital payments including DSH and the waivers' billions in healthcare investments.

Please let me know if we can provide additional information.

Sincerely,

A handwritten signature in black ink, appearing to read 'Maureen Milligan', with a long horizontal flourish extending to the right.
